## Repair Process Flow

## Important Note

- Bitmain repair sites must receive the defective products within 15 days after the creation of such ticket.** Otherwise, if the products been received after the warranty period, then the warranty period of such product cannot be honored. All costs resulted must be borne by you.
- We will repair, or based on our sole discretion, replace a defective product with an identical or similar (e.g. newer) version of the product, unless the defective product is a result of warranty limitations.
- A 180-day warranty is provided to our Antminer and a 365-day warranty is provided to our PSU commencing on the date of item dispatch. To avail of the warranty, you must create a repair ticket before 180 or 365 days of warranty expiration, for the miner and PSU respectively.
- Bitmain will complete the maintenance and/or repair of the defective product in the process of dismantling and diagnosing the product; you agree to the terms of this Out of warranty repair, which means that you understand that we cannot suspend repair process, and you will agree to the repair fee stated in the quotation. Bitmain will not return the defective product to you if you decided not pay the repair fee.
- Bitmain strives to serve the customers truthfully and dutifully, and quote the repair fee as reasonably and accurately as possible. You shall pay the repair fee within 62 days upon receiving quotation of the repair fee, and Bitmain will ship the repaired or replaced product after receiving the full required fee.

- f. The costs of returning of the product, part, or component to our repair site shall be borne by you. If the product, part, or component is returned uninsured, you assume all risks of loss or damage during shipment. We shall not be responsible for any loss due to delivery service of the carriers. Leading international carriers are highly recommended. Using sea freight to deliver defective product is not allowed as the Antminers are susceptible to moisture damage.
- g. Bitmain does not compensate the downtime during the repair process, or downtime resulting from Customs or shipping delays.

## Identifying Defective Part or Miner [Buy a spare part?](#)

- a. If you are able to troubleshoot and certain which part/unit is faulty, please create a repair ticket and ship the part/unit to us. [Online troubleshooting?](#)
- b. If you are not certain how to identify the faulty part/unit, please contact us for more assistance. [Online consultation?](#)
- c. If the hash board, PSU or other part is burnt, oxidized, broken or the PIN on it has fallen off, it will be scrapped and cannot be fixed. Please kindly be aware that you need to pay the repair fee which is approximately the same as the corresponding current retail price. [Scrap or not?](#)
- d. If the customer removes/replaces any components especially hash boards without first receiving permission from Bitmain, for technical reasons the miner/hash board may beyond repair. Customers will need to bear the additional costs and delays in repair.
- e. Please only ship whole Antminers, hash boards, control boards and PSU to our repair centers. kindly be aware that you need to pay the repair fee which is approximately the same as the current retail price of the control board and the fan regardless of your miner's warranty status.

## Return Whole Miner or Parts

For Antminers which need to be sent back the whole machine to us for repair, failure to do so will result in additional costs and severe delay in repair and all costs associated will be borne by customers.

Ship the whole machine for repair	Ship ONLY the defective part OR the whole machine

## Creating Repair Ticket

Remember to update the correct Tracking Number to your Repair Ticket. Update the actual tracking number in your repair ticket within 7 days of repair ticket creation.

Enter the full correct address and contact person information in your Repair Ticket. Address and contact person information related changes will not be allowed once the Repair Ticket is showing "collected status".

- a. Log into your Bitmain account. Go to Support page → Click "Create repair ticket". [Create a repair ticket now? How to create a repair ticket?](#)
- b. It's extremely important to select "Apply for Repair" when creating a repair ticket for miners and hashboards return to us for inspection & repair.
- c. Read the After-sales service terms, click "Accept the Above Terms of Service and Statement" box and click "Next".

- d. Complete the requested information and click "Next". **Please make sure number of items / item types returned matches the Repair Ticket.**
- e. Complete the Tracking Number, Delivery Logistics, Item to be returned and Shipping address information. 1 Tracking Number for 1 Repair Ticket only. If you have multiple tracking numbers, please create corresponding repair tickets. **Please enter the actual shipping tracking number. If you do not have the right tracking number, please try to input the date of today like 2019081500 (Year / Month / Day / Hour). Kindly update the actual tracking number to the ticket once available.** \*This is important as our Repair Center will match the tracking number in the repair ticket online with the tracking number on the package waybill. Ensure the items listed in the repair ticket are the same as the items in the package shipped to us.
- f. Submit

## Preparing Shipment

Ensure all the Hashboards inside the miner are from the original complete unit. Customers will need to bear the additional costs and delays in repair resulted from mixing hashboards from different miners.

To avoid damages during the shipping process, please pack the Antminers separately. Pack with great care. You may use the original packing box if available. Improper packing may result in additional costs and significant delay in repair. You will need to bear all costs associated with improper packing.

- a. Pack the parts carefully. Shipment damage will void the warranty. If PINs are damaged on the hash board, we cannot repair or replace the board and you will need to make a claim with your shipper. Here is a video demonstrating how to pack the hash board: [How to pack?](#)
- b. Be sure mark "deliveries are made on working days only" and "Antminer" on the items description of the waybill. We are not liable for any delay due to this information not being included on the package.
- c. We will not accept "Freight Collect", the packages will be sent back to the sender if you use it. Per the terms of our warranty coverage you need to pay for the shipment to us. We will pay for the return shipment once the repair is complete, subject to warranty coverage.
- d. The costs incurred in connection with the returning of the product, part, or component to our service processing facility shall be carried by the product owner. We shall not be responsible for any loss due to delivery service of the carriers. Leading international carriers are highly recommended.
- e. Bitmain does not provide compensation for down time during the repair process, or down time resulting from Customs or shipping delays.
- f. Do NOT ship products of a company other than Bitmain. Packages containing products of other companies will be returned to the sender or discarded.
- g. We are not able to send more than 60 miners to the same customer one day, please do not ship more than 60 miners together to avoid delay in shipment.
- h. In some cases, it is possible that your tracking number can be changed during the shipping process especially when you use some local Logistics companies. We advise you to keep the SN number of the defective parts for further check in case the tracking number has changed.

## Repair Center Addresses
